

Important Information about Maryland Course Renewals

Recently, the Maryland Insurance Administration and Prometric mailed course renewal notices for courses expiring on December 31, 2015. As of Friday, September 18, 2015, these course renewals may be processed on Compliance Express. All course renewals are reviewed by Prometric and the Maryland Insurance Administration. All approved courses will be given a December 31, 2017 renewal date.

In February 2016, the Maryland Insurance Administration will be issuing extended renewal dates for all of the renewed courses. Notification of the extended renewal date will be sent for each course. The extended renewal date will be in 2018.

For courses that are currently approved for the life/health/property/casualty course category, renewals are **NOT** available. Maryland no longer offers this category and will not continue to offer these courses beyond December 31, 2015. The provider must submit an initial course application. A new course application, course materials and course approval fee must be submitted. Courses are eligible for approval for multiple course categories; providers must indicate on the course application how many hours are being requested for each course category.
